

WHY DO YOU RENT A MAT !

70% of all dirt, entering buildings, is brought in via foot and wheeled traffic i.e.- trolleys and buggies.

WHAT HAPPENS TO THIS DIRT ?

Put simply, the dirt damages:

- The appearance of your floor coverings
- Carpets wear thin through dirt and grit abrasion
- Tiled floors need premature replacement
- Wooden floors need to be stripped and resealed
- Extra cleaning costs
- Only 20% of dirt removed by vacuuming

One of the major features of the dust mat service is that the “Mat” is removed weekly with its load of dust, grit and moisture. The result of this service will:

- **Extend** the life of fixed floor coverings
- **Improve** the appearance of the premises by providing cleaner floors
- **Improve** customer and staff safety by reducing the risk of slipping on wet floors
- **Reduce** cleaning maintenance time and cost
- **Remove** the need for expensive entrance matting
- **Enhanced** presentation of your company

**CLEAN MATS ARE MORE EFFECTIVE AT
TRAPPING DIRT (WET OR DRY),
THAN OTHER FORMS OF PROTECTION**
